Experience

2022
WebHelp

- I worked as an English call consultant for a company with which WebHelp had a contract in 2022.

Projects

2022-2023

Poyraz Robotaxi

- We participated in the Robotaxi Autonomous Vehicle Competition with our autonomous vehicle named 'Karaçor' and achieved the success of becoming a finalist.

2023-2025

UARTEK

- We applied to participate in the ERC (European Rover Challenge) and CIRC (Canadian International Rover Challenge) competitions. Within the team, I contributed to tasks related to the development of the robotic arm and the preparation of virtual environment simulations.
- We designed a galvanometer-based air defense system and submitted it to the Teknofest competition. Within the project, I was responsible for developing the user interface that enabled both autonomous and manual control of the system.

Education

2022 – 2027
Mechatronics Engineering
Manisa Celal Bayar University

Skills

- MS Office
- HTML & CSS
- JavaScript
- NodeJS
- SvelteKit
- Python
- PyTorch
- ROS2
- SolidWorks

Languages

- Turkish (C2)
- English (C1)
